

MEET OUR GROWER

AGB Farms

Location: Hammonton, New Jersey

Product: Fresh/Frozen Blueberries

-First Generation Family Farm

-100% Drip Irrigation

AGB Farms consists of 100 acres of blueberries, purchased by Rick Berenato in 2013. Rick was committed to improving the farm's production and preserve its natural resources, which lead him to hire a full-time farm manager, Jerry DeFiccio, in 2015.

AGB Farms has converted the entire irrigation system to drip irrigation, which conserves water and makes applying fertilizing more efficient.

AGB also participates in the Integrated Pest Management program through Rutgers University and is Primus Global Food Safety certified, the highest standard in the industry.
